SCOTTISH AIR QUALITY DATABASE & WEBSITE (SAQD)

The Scottish Government

In 2011 there are currently **83** monitoring sites on Scottish website of which 15 are AURN (National Network) and 68 Local Authority sites funded by the SG

Data from LA sites incorporated onto SAQD are comparable to AURN sites (follow the same QA & QC procedures) resulting in the harmonisation of the majority of Scottish air quality monitoring data

The Scottish Government

The SAQD has reached a critical mass of harmonised data across Scotland - it is now a useful repository from which we can derive trends in air quality for Scotland and develop a Scottish AQ indicator
