

Questions from Local Authorities

Question 1

PM_{2.5} monitoring - dates for implementation and expectations for monitoring.

Question 2

Monitoring problems with FDMS units - problem identified at Edinburgh's St Leonards AURN site.

How many other units within the network have been affected/have any checks being undertaken? Implications for the application of VCM

Question 3

Removal of the salt component from PM_{10} .

How will this be addressed?

Question 4

Optimistic projection factors for roadside concentrations of nitrogen dioxide

Implications for air quality and planning

Question 5

Availability of DEFRA and the Devolved
Administration's draft review of LAQM regime

Question 6

We have a site which exceeds the 18 micrograms per cubic metre AQO for PM₁₀ on certain rolling 12 month averages, but not on others. We understand from TG09 and the help desk that we should only report and declare on calendar years (January to December)
